DETAILED ACTION

Status of Application, Amendments, and/or Claims

1. The Preliminary Amendment filed 11 February 2002 has been received and entered in full.
2. The Preliminary Amendment filed 6 August 2002 has been received and entered in full.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.
4. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
5. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) **17-26**, drawn to a method of *preparing mammalian microcubes* of cerebral material and microcubes, classified in class 435, subclass 325, for example.

Group 2, claim(s) **27-40**, drawn to a method for *identifying compounds* that are able to modulate the release of a least one *neuromediator*, classified in class 435, subclass 7.1, for example.

Group 3, claim(s) **41-43**, drawn to a method of *dosing catecholamine* in a sample, classification dependent upon agent structures.

Art Unit: 1647

Group 4, claim(s) **44-45**, drawn to a method for *identifying compounds* that are able to modulate the release of *catecholamines* from nerve tissue, classification dependent upon agent structures.

6. According to PCT Rule 13.2, unity of invention exists only when there is a shared same or corresponding special technical feature among the claimed inventions. Each group has a different special technical feature not shared by the remaining groups.
7. Group 1 has the special technical feature of making microcubes not shared by any of the remaining groups.
8. Group 2 is directed to which has a special technical feature of a compounds that modulate the release of at least one neuromediator not shared by any of the remaining groups.
9. Group 3 has the special technical feature of dosing catecholamine in a subject not shared by any of the remaining groups.
10. Group 4 is directed to which has a special technical feature of a compounds that modulate the release of catecholamines not shared by any of the remaining groups.
11. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
12. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and/or different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1647

13. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
